

BANKNOTE DETECTOR & COUNTER COUNT-JET CJ-6230

The **COUNT-JET CJ-6230** professional banknote counter and detector is designed for professional use. It can check and count EURO banknotes of different denominations **at 4 speeds**. **1st speed 500 notes per minute 2nd speed 1000 notes per minute 3rd speed 1500 notes per minute and 4th speed 1800 notes per minute.**

This professional **COUNT-JET CJ-6230** banknote counter and detector performs **3 functions**:

- **COUNT:** Counting all banknotes in total. (e.g. 1 x 50€ ,2 x 20€ ,5 x 10€, 3 x 5€ = 11 bank notes).
- **VALUE:** Counting the value of banknotes (total and by value) e.g. 1 x 50€ ,2 x 20€ ,5 x 10€, 3 x 5€ = 155€ and 11 banknotes).
- **SORT:** The machine recognizes the first banknote and considers it as the default. It will continue counting until it recognizes a banknote different from the first one.
- **BAT:** Select a quantity of banknotes, the counter will automatically start counting and will stop when it reaches the desired quantity. (e.g., if you select a quantity of 50 banknotes, the counter will stop as soon as it reaches 50 banknotes).

The professional **COUNT-JET's** counter and detector checks the authenticity of banknotes **in 5 different ways**:

1. Optical density detection
2. Size detection
3. Magnetic detection
4. Infrared detection
5. UltraViolet detection

Approved by the European Central Bank (ECB)

Finally, it has an **LCD screen, RS-232 interface, capacity for counting up to 500 banknotes and capacity of 200 already counted banknotes.**

Optionally, you can add an external display and a thermal printer for results

Includes Micro SD card slot for software upgrades
